Subject: USDA EIS Appendix - EFED comments

Hi Kay and Dan,

EFED has looked through the USDA EIS appendix and made some comments on the 2,4-D choline salt section. Since our Branch also wrote the quizalofop assessment, we took a look at that section too. There's one comment in the quizalofop section about the timing of Reg Review that you may want to follow up on with PRD.

Please look through our comments and let us know if anything needs further clarification.

Thanks and if USDA has questions or wishes to talk by phone, we're happy to accommodate!

Meghan
